WE BELIEVE

IN WHAT WE DO.

WE TRANSFORM.

We transform spaces into expressions of true art. Our teams & our innovations are driven with a single-minded proposition to create unique products, making us amongst the top 3 manufacturers of decorative laminates in the world.

Since our inception, we have been a hallmark of exceptional artistry and an unbridled passion for innovation. We offer end-to-end surfacing solutions with our expansive selection spread of laminates, compacts, veneers, engineered wooden floors, engineered wooden doors & plywood. With five state-of-the-art manufacturing facilities in the country, located at Behror (Rajasthan), Nalagarh (Himachal Pradesh), Prantij (Gujarat), Tindivanam (Tamil Nadu), and Naidupeta (Andhra Pradesh), we are the first choice for individuals, architects & interior designers when it comes to transforming living spaces. Our vibrant designs add a touch of magnificence to any space with an assortment of decors furnished with captivating features. With a channel partner spread across the country & a robust team of sales professionals, Greenlam is just a call away to turn your space into an unforgettable experience.

WHAT MAKES

GREENLAM THE

BEST CHOICE?

Global Presence : A worldwide presence across 100 countries and more.

Amongst Top 3 : Rated amongst top three Interior Infrastructure Companies.

Largest Exporter : Awarded the coveted Largest Laminate Exporter from India.

Premium Papers : Use of 100% imported premium papers sourced from Europe, Japan, etc. ensures the longevity of laminates.

Colour Consistency : Equipped with adequate technology, we deliver every colour across wide applications, with precision.

NSF : All Greenlam Laminates and Compacts are certified by the prestigious American body, NSF International, making them the safest laminates for human health. "Our surfaces have also been tested in accordance with EC directive 1935 with regards to food safety. Our products are proved fully compliant through testing to the demanding EU Food Commission Regulation 10/2011 with successful testing to BSEN 1186-1:2002, BSEN 1186-3:2002 and BSEN 1186-14:2002".

Quality Product : State-of-the-art manufacturing facility provides a products that complys with quality standards like ISO 9001, ISO 14001, ISO 45001, ISO 50001, DIN EN 438, BS 438, NEMA LD3 -2005, and BIS 2046-1995.

Green Product & Practice : Superior manufacturing process has earned us GreenGuardGold, GreenGuard and GreenLabel certifications, making us the only laminate company in the world that trades carbon credits earned with our practices.

FSC® Certified : Responsible management of the world's forests.

Anti-Virus , Anti-Bacterial, Anti-Fungus: Entire range of Greenlam Laminates and Compact Laminates are Anti-virus*, Anti-bacterial**, and Anti-fungal. Greenlam Laminates - now proven effective against SARS-Cov-2*** virus making it world's 1st Covid-19 resistant laminates.

Disclaimer :
 *As per the test report virus gets 99.99% retarded in 24 hours of contact
 **As per test report bacteria gets 99.99% retarded after 24 hours of contact
 ***As per the test report SARS Cov-2 virus gets more than 99% retarded after 45 mins of the contact

BEAUTY WITH SUSTAINABILITY

At Greenlam, we understand sustainability as how we consume and harness resources, not only in the environment but in the society and economy too. We believe creating beautiful spaces can never be at the cost of causing damage to our planet because climate change is a reality. Hence, we are committed to making better products using processes that are sustainable and their impact gentle on the people and the planet.

Our Green Strategy Group is working relentlessly since years to keep our impact positive on the environment. The group's task is to single-mindedly work towards developing, implementing, and monitoring several green initiatives across our organisation so that whatever we do, we leave behind something meaningful, and not just our carbon footprints.

Water Conservation

Our vision is to create a balance between economic growth and positive social impact by embracing methods that promote environmental protection and renewal.

One such method is using a pressurised hot water process that significantly reduces groundwater withdrawal. Several other operations have been integrated into the utility system so that Greenlam achieves the industry's benchmark of water consumption per unit produced. Due to these developments, we have successfully reduced our groundwater withdrawal, STP loads, and the consequent power consumption.

During the current year a record 39.48 million litres of water was saved across all manufacturing locations, which is equivalent to annual household water requirement of 0.2 million people.

We have doubled our rainwater harvesting potential during this year and recharge over 60,000 KL

Natural Products substitute synthetic inputs:

Not every solution has to be factory fresh. For our everyday challenges, we have started to look at nature for simple, organic solutions. And slowly we are making changes that can make a world of difference. Like our decision of using naturally occurring products such as cashew nut shells in place of synthetic and petrochemical products. A waste in cashew processing, these shells are one of the best sources of long-chain phenols. Greenlam succeeded in substituting about 12% of our phenol use that has helped modify our resin technology, subsequently resulting in:

- Enhancing the product flexibility and machinability
- Reducing the emission of VOCs from the process as well as the final product
- Reducing the handling and storage of hazardous materials in the plant
- Achieving uncompromised performance
- Eliminating the need for process washing, enabling zero discharge from the plant.

Zero Liquid Discharge

Unsustainable consumption is putting great pressure on the planet by creating wastage that ends up contaminating our water and soil. At Greenlam, we make sure nothing toxic leaves our plants. To keep a check on this, we continuously monitor, research and take up process modifications. The processes ensured that no liquid discharges leave the factory and at the same time a reduction on STP and ETP loads are achieved.

Renewable Energy Utilisation

We make full use of various renewable energy resources available to preserve our environment. Not only are they easier to procure and more economical, but they are also much less harmful.

- We used 26,685 MT of biofuel in the current year which recorded an increase of 68% over the last year.
- This resulted in offsetting 2.5 million tons of CO2 emissions, and our solar energy plant continues to supplement and generate energy, taking us one step closer to a cleaner and greener environment.
- Today 32.4% of our total energy consumption comes from renewable sources.
- Our renewable energy consumption is equivalent to 100.18GWh electricity or equivalent to substituting 9490.5KL High Speed Diesel. This is useful for running 1000 heavy trucks for about 1600 KM or running 80 cargo ships for a day.

Responsible Forestry

Relying on the forests for our raw material requirements, we are sincerely committed to the cause of conserving them. Our products are FSC and PEFC certified, validating our claims of sustainable and responsible management of natural resources.

Along with recycled inputs, pre- and post-consumer content validation are determined for every product to safeguard the highest performance characteristics and meet all emission norms. We succeeded in using about 30% of recycled papers during this year. This offset felling of over 312,000 trees that are 40 feet tall and at least 8 years old.

And that's not it. Some parts of our planted area also utilise native or adaptive tree species indigenous to the regional climate, being beneficial for the society, economy, and the environment.

We achieved an 8% reduction of packing wood during the current year.

Environment-Friendly Products

The safety of our consumers is always our priority. Our products, therefore, have a Greenguard, Greenguard Gold, Green Label (Singapore), and EN 16516 certification. Being compliant to all the expected standards of VOCs, formalin, and other allied chemical constituents' emissions, Greenlam products are safe to use. Greenlam HPLs are eco-labelled by GRIHA & GreenPro certification.

Monitored Indoor Air Quality (IAQ)

We take the health of our employees very seriously. And so, to ensure a healthy work environment, we continuously monitor the emissions and carry out periodic tests to keep the indoor air quality in check while conserving the atmospheric air.

Safe and Non-Hazardous Products

Greenlam products are non-hazardous and do not fall into the list of 'Deleterious Materials', Appendix J. We do not use asbestos, chromates, arsenate compounds, lead, or any other heavy metals during production. We adopt and comply with the latest requirements of REACH regulations.

We also ensure that no urea or urea-formaldehyde gets added to any of the products. Along with this, our products do not contain regulated levels of NTP (National Toxicological Program), IARC (International Agency for Research on Cancer), or OSHA Listed Carcinogens.

Responsible Logistics Systems

Mindful of the alarming levels of pollution in our country, we take all the necessary measures to not add to the problem. The trucks are loaded optimally in order to regulate the emissions and yield ideal per capita fuel consumption per unit of the product. The trucks used are ensured to comply with all regulatory norms.

Effective Waste Management

"Reduce, reuse, recycle" is a mantra that we at Greenlam live by. Real-time monitoring of our resources has significantly reduced our waste production and cut down on our processing and disposal costs. All this resulted in additional saving in felling of 24000 trees.

Greenlam has published the Environment Product Declaration

for both thin and thick variants. The declaration makes entire environmental data available to all the interested parties. The data is in line with the industry norms and shows significant conservation and reduction of relevant attributes on environmental impact.

The background is a light-colored marbled pattern with a central vertical axis of symmetry. It features three horizontal decorative bands: a thin grey band with small gold dots at the top, a wider tan band in the middle containing the text, and a dark brown wood-grain band at the bottom.

L A M I N A T E S

FEATURES

- Anti-virus, anti-bacterial and anti-fungal
- Resistant to scuff and scratch
- Resistant to dry and wet heat
- Resistant to harmful chemicals and organic solvents
- Hygienic
- Greater dimensional stability
- Emit low VOCs
- No urea
- Environment-friendly, green DNA

APPLICATIONS

- Doors
- Furniture
- Wall panelling
- Work-tops
- Column claddings
- Lockers

Greenlam
LAMINATES

Greenlam anti-bacterial and anti-virus laminates brings to you a legacy of exceptional artistry, unsurpassed quality, and an unyielding passion for excellence. These laminates are more than just beautiful surfaces with their ability to retard the growth of up to 99.99%* bacteria and viruses on their surface. They not only add an understated style to spaces but also meet all parameters of health and environmental safety. So, go ahead, and craft the interiors of your dreams with mesmerising textures and decors available in our latest collection curated by French design experts after their extensive research on trends across industries.

RANGE/OFFERING

Available in more than 500 decors and over 25 textures.

- 940 x 2160 mm / 3.08 x 7.08 ft
- 1220 x 2440 mm / 4 x 8 ft
- 1220 x 3050 mm / 4 x 10 ft
- 1300 x 3050 mm / 4.25 x 10 ft
- 1525 x 3660 mm / 5 x 12 ft
- 1830 x 3660 mm / 6 x 12 ft

0.7 mm to 1.5 mm

As per the test report Virus gets 99.99% retarded in 24 hours of contact
As per the test report bacteria gets 99.99% retarded after 24 hours of contact

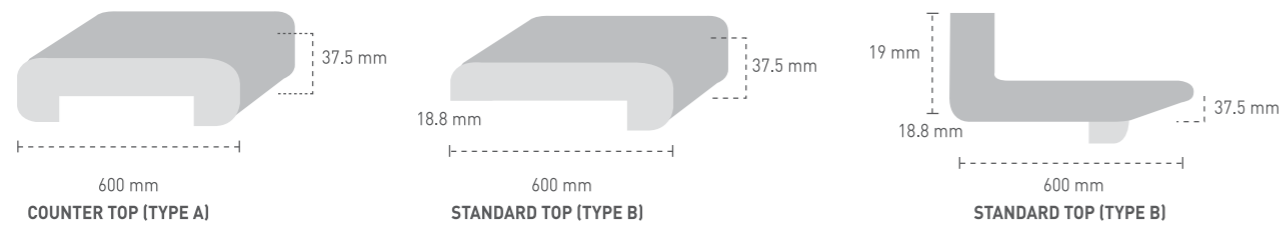

Make edges seamless with Greenlam Postforming Laminates. Armed with added flexibility and malleability, they can bend up to a radius of 6 mm, making them a perfect choice for your interiors. Intended for both vertical and horizontal applications, Postforming Laminates are ideal for counter tops, cabinets, and furniture tops as they can be curved without losing the grain pattern while preventing water seepages into crevices. They are available in multitudes of decors to add a refined look and depth to an otherwise mundane-looking interior design.

DECOLINER

LAMINATE & COMPOSITE PANEL

Let the durability lead to its core! Presenting Greenlam Decoliner Laminates & Composite panels. With its unique ensemble of designs, superior quality, durability, and dimensional stability, Greenlam Decoliner laminates & composite panel are an ideal balancing material for those looking to enhance the beauty and protect the insides of their furniture, wardrobes, cabinets and so forth. Decors are available in Woods, Colours and Fabrics categories with varying thicknesses and textures. The possibilities are endless for you to adorn the insides of your furniture.

Recommended for vertical applications only.

ADVANTAGES

- Superior quality
- Superior dimensional stability
- Durable

FEATURES

- Moisture resistant
- Impact resistant
- Low VOC
- Borer/termite resistant

APPLICATIONS

- Cabinets or wardrobes
- Workpace partitions
- Exhibition stalls
- Food stalls

RANGE/OFFERING

Available in more than 15 decors.
Decoliner laminates are offered in Suede, Matt & Gloss finish.
Decoliner Composite Panel are offered only in Suede & Gloss finishes.

1220 x 2440 mm / 4 x 8 ft

Decoliner laminates
 0.70 mm, 0.80 mm & 0.92 mm.
Decoliner Composite Panel
 2.50mm, 3.00mm, 4.00mm, 5.00mm & 6.00mm.

■--- ADVANTAGES -----■

- No toxic emissions
- Crack-resistant
- Resistance to surface wear
- Resistance to scratches
- Dry heat resistant
- Unmatched dimensional stability
- Stain-resistant
- Environment-friendly, Green DNA

■--- FEATURES -----■

- 10-year warranty
- Green credentials - greenguard, FSC, and GreenLabel.
- Anti-bacterial and anti-fungal

■--- APPLICATIONS -----■

- Residences
- Wall paneling
- Doors
- Furniture
- Work stations

NewMika Laminates from the house of Greenlam is a name synonymous with contemporary designer laminates in India. Driven by an unflinching drive to innovate and introduce novel trends, NewMika strives to cater to the diverse prerequisites of our customers with an exclusive selection of laminate designs attuned with modern style sensibilities. Along with disruptive designs, NewMika brings a promise of safety with its Anti-bacterial laminates that retard the growth of bacteria on surfaces by 99.99% with a 10-year warranty.

■--- RANGE/OFFERING -----■

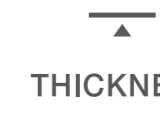

DESIGN

Available in
more than 400 Decors
with 20 Texture options

SIZE(S)

1220 x 2440 mm / 4 x 8 ft

THICKNESS

1.25 mm to 1.00 mm

NEW MIKA[®] SUPERLINER

The new age liner laminate collection expertly crafted, with an elegant curation of designs inspired by global design trends. NewMika Superliner is the perfect balancing material to beautify, protect and add a touch of elegance to the insides of your wardrobes, cabinets, furniture and much more. NewMika Superliner is offered in 3 categories, Woodgrain, Fabric and Solid decors. It is provided in 3 textures and varying thicknesses.

ADVANTAGES

- Enhanced quality
- Robust
- Superior & uniform sanding technique

FEATURES

- Moisture resistant
- Impact resistant
- Borer/termite resistant

APPLICATIONS

- Back panels of kitchen and wardrobes
- Workspace partitions
- Aluminium door inserts (frames)
- Exhibition stalls
- Economical washrooms with aluminium framing
- Site offices/ porta cabins
- Changing rooms/ trial rooms
- Hatcheries – incubators
- Food stalls

RANGE/OFFERING

Available in more than 15 decors.
Superliner laminates are offered in Suede, Matt & Gloss finish.
Superliner Composite Panel are offered only in Suede & Gloss finishes.

1220 x 2440 mm / 4 x 8 ft

Superliner laminates
0.70 mm, 0.80 mm & 0.92 mm.
Superliner Composite Panel
2.50mm, 3.00mm, 4.00mm,
5.00mm & 6.00mm.

C O M P A C T S

ADVANTAGES

- Self-supporting
- Greater dimensional stability and flatness
- Resistant to abrasion
- Resistant to water
- Resistant to fire
- Excellent hygiene properties
- Resistant to harmful chemicals and organic solvents
- Simple and quick assembly without the need for edging and adhesive

FEATURES

- Antivirus, antibacterial.
- In case of combustion, emits low amount of harmful gases and fumes
- Does not rot or cultivate fungi, mildew, and spores
- Decorated both sides, in a wide colour/pattern range, to ensure flatness
- Easy to handle; it can be sawn, drilled, milled, shaped, and threaded

APPLICATIONS

- Restroom Cubicles
- Partitions
- Lockers
- Worktops
- Institutional furniture

**COMPACT
LAMINATE**

Greenlam Compacts Laminates are the quintessential product when it comes to demanding and functional surfaces. Crafted for both vertical and horizontal applications, these durable and self-supporting decorative panels are the right choice for paneling, modular restroom cubicles, partitions, worktops, institutional furniture, and lockers.

These compact laminates are made up of decorative paper (treated with melamine resins) and kraft paper (treated with layers of phenolic) that are bound together with thermosetting resins at a temperature of more than 150° Celsius. They are manufactured using quality materials with high technical characteristics, making them highly resistant to scratches, water, fire, and chemicals.

RANGE/OFFERING

Available in more than
80 decors.

- 1220 x 2440 mm / 4 x 8 ft
- 1220 x 3050 mm / 4 x 10 ft
- 1300 x 3050 mm / 4.25 x 10 ft
- 1525 x 3660 mm / 5 x 12 ft
- 1830 x 3660 mm / 6 x 12 ft

3 mm
to
25 mm

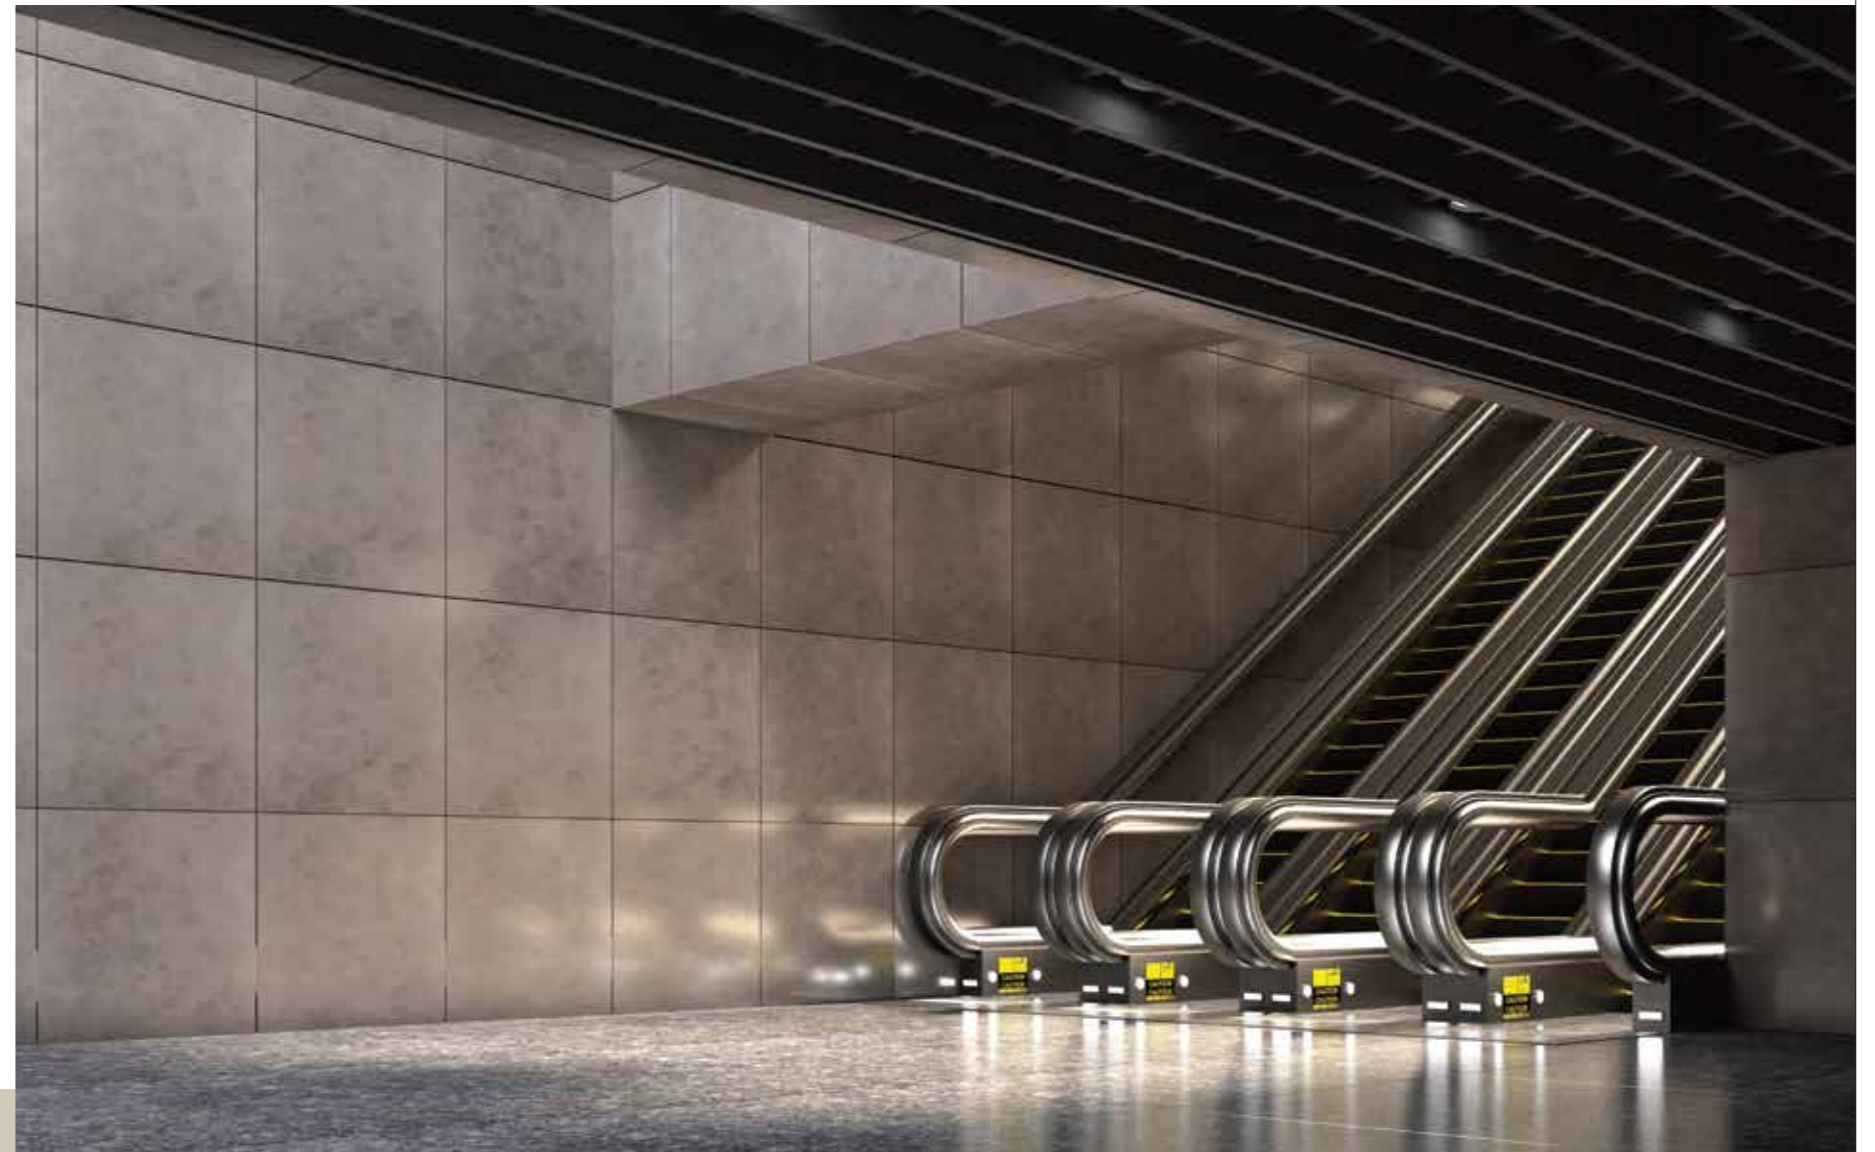

CLADS
INTERIOR GRADE COMPACT LAMINATES

The Greenlam Interior Cladding System offers revolutionary cladding solutions for interior surfacing panels which are designed to withstand harsh conditions with as little maintenance as possible. They have seen immense success in application in areas such as Healthcare, Shopping Malls, Airports, Educational Institutions, Commercial Spaces, Metro Stations, Railway Stations and Hospitality Industry — and the secret lies in the unmatched technology that manufactures Greenlam Clads.

ADVANTAGES

- Abrasion-resistant
- Scratch-resistant
- Fire-retardant
- Impact-resistant
- Resistant to harmful chemicals and organic solvents
- Water-resistant
- Dry and wet heat resistant

FEATURES

- Anti-virus, anti-bacterial, and anti-fungal
- East to install
- Easy to clean and low maintenance
- Environment-friendly, green DNA

APPLICATION

- Hospitals
- Hospitality
- Retail outlets
- Educational institutes
- Public institutions

RANGE/OFFERING

DECOR/
TEXTURE(S)

Available in more than 60 decors.

SIZE(S)

• 1830 x 3660 mm / 6 x 12 ft

THICKNESS

9 mm

A duo of style and character to enhance your exteriors, Clads Exterior Grade Compact Laminates are engineered and developed through GLE technology: 3 layers of protection that withstands extreme weather conditions. You can now style your facades, attics, and balconies with these innovative designs to play on the exteriors of concrete structures.

■--- ADVANTAGES -----■

- Excellent light-fastness property with 3 layers of UV protection
- Fire rating Bs1d0 as per EN 13501
- Anti-graffiti
- Can withstand extreme temperature conditions from -60°C to +80°C
- Environment-friendly green DNA with no urea content
- Chemical-resistant
- Saves up to 30% energy
- Complementing hardware (rivets)
- Anti Dust
- 12 years warranty
- Moisture resistance
- Low VOC
- Acid rain resistance
- Corrosion resistance
- Termite resistance
- Acoustic resistance

■--- FEATURES -----■

- Anti-fungal and anti-bacterial
- Green credentials-Greenguard, Greenguard Gold & FSC®
- Design and shade consistent with each other

■--- APPLICATIONS -----■

- Hospitals
- Hospitality
- Retail outlets
- Educational institutes
- Public institutions

■--- RANGE/OFFERING -----■

Available in more than 40 decors; Suede texture.

1300 x 3050 mm / 4.25 x 10 ft

6 mm
8 mm
10 mm

ADVANTAGES

- High performance UV & weather-resistant film for surface protection
- Fire rating Bs1d0 as per EN 13501
- 10-year warranty
- Termite-resistant
- UV-resistant
- Can withstand temperatures as low as -50° C and as high as 80° C
- Anti-graffiti

FEATURES

- Weather-resistant surfaces with imported Décor paper
- Green credentials-Greenguard, FSC, and GreenLabel
- Anti-bacterial and anti-fungal

APPLICATIONS

- Residences
- Hotels
- Office buildings
- Stores
- Public institutions

NEW MIKA FX
EXTERIOR GRADE COMPACT LAMINATE

An extraordinary collection of exterior-grade laminates that will transform any space into a masterpiece! With a perfect blend of sophistication, durability, and simplicity, the NewMika FX encapsulates the essence of exceptional craftsmanship. Engineered with advanced weather-resistant technology, NewMika FX provides exceptional longevity and protection against rain, wind, UV rays and sunlight. Whether in scorching summers or freezing winters, NewMika FX ensures long-lasting performance, making it the ultimate choice for all-weather.

Sturdo

RESTROOM CUBICLES & LOCKERS

Long known for its incredible range of products that are strong, robust, and aesthetically appealing, Greenlam Sturdo now introduces a fresh, new line up of Restroom Cubicles and Locker Solutions. This exquisite range has been designed by eminent international designers, keeping in mind, the needs of the Indian consumer and the environmental challenges. The best-in-class range is sturdy, durable, and suitable for dry as well as humidity prone areas such as fitness clubs, sauna rooms, swimming pools, retail environments, hospitals, and sport centres. Each piece is an amalgam of architectural innovativeness and scientific engineering down to the last detail. Discover the cutting-edge world of Restroom Cubicle Solutions, from the house of Greenlam, where art and science express themselves in a range never seen before.

ADVANTAGES

- Hygienic and easy to maintain
- Resistant to harmful germs and cleaning agents
- Noise deafening system to avoid disturbing 'door banging' sound
- Wide spectrum of colours to choose from
- High-wear and abrasion-resistant

SPECIALITY-LAMINATES AND COMPACTS

ADVANTAGES

- Greenlam FR Grade Laminates meet the requirement of specified fire tests conforming to BS 476
- Offers Class-I Fire Rating (Provided the fire retardant adhesive and substrates are used)
- Class-I Fire Retardant Laminates do not allow fire to spread further, once the source is removed, it extinguishes itself within a stipulated time
- Eliminates the risk of toxic smoke
- Fire rating Bs1d0 as per EN 13501

FEATURES

- Fire-resistant
- Abrasion-resistant
- Scratch-resistant
- Stain-resistant
- Crack-resistant

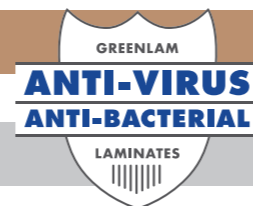

APPLICATIONS

- Multiplexes
- Hospitals
- Hospitality
- Educational institutes
- Public spaces
- Commercial buildings

FIRE RETARDANT HPL & COMPACT

A result of extensive research and development, Greenlam Fire Retardant Compacts and Laminates are safe and sturdy. Treated with imported fire-retardant chemicals that minimise smoke emission and delay the temperature rise, this range is resistant to fire and its ill-effects. The fire retardant chemical used is halogen-free that eliminates the risk of toxic smoke. It's indeed a safe and recommended product for kitchens, cinema halls, and malls, to just name a few. So now you can beautify your interiors without compromising on safety.

**ELECTROSTATIC
DISSIPATIVE**
HPL & COMPACT

We all have experienced the effects of static electricity when clothes stick together, hair stand up, and of course, when the lightning strikes. But, do you know that static electricity is a serious industrial problem estimated to cause more than \$5 billion in damages, annually? Greenlam proudly presents Electrostatic Dissipative Compacts and Laminates — a ground-breaking laminate solution that provides a safe and better environment for furniture or other surface applications in electrostatic high-risk areas. Inbuilt with a futuristic technology and electrostatic charges consumption formula, these compacts and laminates drain out static charges and minimise the risk of sparking or damage to sensitive appliances. Also, they repel the dust particles from accumulating on the surface, thereby maintaining a clean and healthy workspace.

■--- **ADVANTAGES** -----■

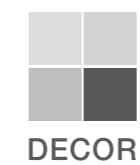

- The ESD laminates are ideally suited for assembly testing, and manufacturing work surfaces or for any other application where highly effective electrostatic dissipative protection is needed
- Compared to conventional thermoplastics, this material exhibits excellent dimensional stability, along with having five times the stiffness of alternative materials
- Compared to coatings, the product provides a uniform thickness of ESD protection across the entire material surface. In addition, the surface does not crack or chip
- Dust with different elements in laminates aggravate several health disorders like allergies, asthma, eyesores, fatigue, etc. ESD laminates do not allow dust particles to accumulate on the surface, resulting in a clean and healthy work place

■--- **APPLICATIONS** -----■

- IT Offices
- Electronic industries
- Offices where electronic gadgets are regularly used
- EPA zones within working areas
- Call centres
- Pharmaceutical labs
- Laboratories

■--- **RANGE/OFFERING** -----■

Available
in 5 decors

- 1220 x 2440 mm / 4 x 8 ft

0.7 mm
to
25 mm

ADVANTAGES

- Chalk-boards are an excellent economic alternative for writing board in schools
- The surface colour renders excellent contrast against chalk marks
- The special characteristics of Greenlam Chalk-board surface ensures perfect continuity in chalk marks for hassle-free and readable writing
- Easy cleaning for dry and wet erase marks
- Marker grade also available with gridlines

APPLICATIONS

- Conference rooms
- Auditoriums
- Colleges and schools
- Institutions

CHALK & MARKER GRADE LAMINATE

Marker Board: Greenlam Marker Board Laminates are a perfect solution for markers at schools and offices. These laminates turn into spotless surfaces with a single wipe, leaving no ghost effect. They are made with decorative papers that are impregnated with melamine resins (to facilitate liquid chalk removal) and synthetic polymer (to impart excellent durability) for easy cleaning of dry and wet erase marks.

Chalk board: Greenlam Chalk Board has a special surface for easy erasure of standard writing chalk. It is made with decorative surface papers impregnated with melamine resins that are pressed over kraft paper core panels. They are then bonded under heat and pressure into thermosetting plastic panels. The finished panels are finally trimmed and the backs are sanded to facilitate bonding.

decowood[®]
PREMIUM VENEERS

NATURAL | TEAK | ENGINEERED

Decowood has been a patron of wood since its inception. At Decowood, it's not just about chiselling away blocks of wood for homes, but also the craft and science that goes behind creating these spectacular pieces of art. With a reputation that spans across 100 countries and over 200 varieties of veneers, Decowood has probably the largest collection to choose from. Each veneer of Decowood infuses the techniques of master craftsmen through centuries along with the touch of technology. And these designs have to be seen to be believed. They not only seep into our mind and heart, but also command an authoritative presence when they are installed.
